

9 DEC 2017 DS-DSG GATHERING

On 9 December 2017, DS-DSG held its fourth and last gathering of the year and listened to our DS Vice-President and Endocrinologist Dr Kevin Tan speak on “Understanding Medicine and Technology (flash glucose monitoring) and how it can help improve your diabetes”.

Fresenius Medical Care was also present to share about “Kidney Options” such as Haemodialysis (HD) and gave a demonstration on how to set up the Peritoneal Dialysis Machine to give us all a better understanding of how Peritoneal Dialysis can be easily done at home.

We wrapped up with a broadcast of DSG events for the next three months and a video of DSG events consolidated by Jimmy Ong as well as a hearty and healthy snack of wholemeal sandwiches and low GI Quinoa Banana cake.

DS-DSG member Chris Tang said, “Dr Kevin Tan gave a timely reminder and education to people who are resistant to taking medication to fight diabetes. He also addressed pertinent and tricky questions from participants eloquently. Many thanks and appreciation to Dr Tan for giving us his Saturday afternoon. Thanks also to Fresenius for their support and especially to Juliana for putting it all together.”

Thank you also to Diabetes Singapore for their commitment to DSG and for giving us numerous opportunities to meet and gather, and learn from one another.
